

Bavaria California
Technology Center
Bayerisch-Kalifornisches
Hochschulzentrum
an der Friedrich-Alexander-
Universität Erlangen-Nürnberg

Announcement February 2010

Funding of projects by the Bavaria California Technology Center Deadline: April 15th, 2010

The Bavaria California Technology Center (BaCaTeC, www.bacatec.de) promotes the **cooperation of research facilities in Bavaria and California** in the high-tech areas of life sciences, information- and communication technologies, new materials, environmental technology and mechatronics. Preferred subject of sponsoring is the **initial funding of new projects**, especially those which support the exchange of scientists in reference to the projects.

Financial support may be granted to submitted projects that describe the **initiation of lasting cooperation** between Bavarian and Californian facilities and which will be supported by other institutions in the future. **Interactions between universities and companies are sponsored as well.** The initial funding provided by BaCaTeC will mainly cover expenses for travel and accommodations. The general **upper limit** of financial support is **€10.000,-** per project.

Application forms for financial support of the cooperation with universities (and the economy) in California are available at **www.bacatec.de**. The next deadline will be **April 15th, 2010**. Applications are **limited to two pages** (DIN-A4). Sponsored projects will be selected by the beginning of June.
